DETAILED ACTION

Receipt of Request for Continued Examination and Amendments filed 6/14/06 are acknowledged. Claims 1-18, 20-728, 30, 32-35, 39, 43-74 are pending.

It should be further noted that a restriction may be made at any time during prosecution if the examiner considers there is a burdensome search. See MPEP 811.02. Applicant's new claims including a claim directed to a non-elected invention (a method of treating edema) necessitated a restriction requirement.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 16-18, 20-328, 32-35, 39, 43-49 drawn to a the process of making torsemide modification II and product made (torsemide modification II), classified in class 514 subclass 347.
- II. Claims 2-6, 9-15, 50-74 drawn to pharmaceutical composition and a method of treating edema, classified in class 424, subclass 400.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the process make a materially different product than that claimed in invention II. Invention I is directed to making a torsemide modification II comprising less than about 0.5% torsemide. However, the composition claims are directed to a composition that comprises torsemide

Art Unit: 1616

modification II (claims 2-5) and a composition that comprises high purity torsemide or torsemide modification II with trace amount of modification I (0.5 to 2%).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Further the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to King Wong on September 1, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sharmila S. Gollamudi whose telephone number is 571-272-0614. The examiner can normally be reached on M-F (8:00-5:30), alternate Fridays off.
